

Regional GDP

GDP per capita in the EU in 2011: seven capital regions among the ten most prosperous

In 2011, GDP per capita¹, expressed in terms of purchasing power standards², in the EU28's 272 NUTS-2³ regions ranged from 29% of the EU28 average in the regions of **Severozapaden** in Bulgaria and **Nord-Est** in Romania, to 321% of the average in **Inner London** in the United Kingdom.

This information is taken from data released by Eurostat, the statistical office of the European Union.

The bar shows for each Member State the range from the region with the lowest value to that with the highest value.

41 regions with GDP per capita above 125% of the EU average...

The leading regions in the ranking of regional GDP per capita in 2011, after **Inner London** in the United Kingdom (321% of the average), were the **Grand Duchy of Luxembourg** (266%), **Bruxelles/Brussel** in Belgium (222%), **Hamburg** in Germany (202%), **Bratislava** in Slovakia (186%), **Île de France** in France and **Groningen** in the Netherlands (both 182%), **Stockholm** in Sweden (173%), and **Praha** in the Czech Republic (171%).

Among the 41 regions exceeding the 125% level, eleven were in **Germany**, five each in the **Netherlands** and **Austria**, three each in **Belgium**, **Italy** and the **United Kingdom**, two each in **Spain** and **Finland**, one each in the **Czech Republic**, **Denmark**, **Ireland**, **France**, **Slovakia** and **Sweden**, as well as in the single region **Grand Duchy of Luxembourg**.

It should be noted, however, that in some regions the GDP per capita figures can be significantly influenced by commuter flows. Net commuter inflows in these regions push up production to a level that could not be achieved by the resident active population on its own. There is a corresponding effect in regions with commuter outflows.

...and 75 regions below 75%

The eight lowest regions in the ranking were all in Bulgaria and Romania, with the lowest figures recorded in **Severozapaden** in Bulgaria and **Nord-Est** in Romania (both 29% of the average), followed by **Severen tsentralen** in Bulgaria (31%) and **Yuzhen tsentralen** in Bulgaria (32%).

Among the 75 regions below the 75% level, fifteen were in **Poland**, nine in **Greece**, seven each in the **Czech Republic** and **Romania**, six in **Hungary**, five each in **Bulgaria** and **Italy**, four each in **Portugal** and the **United Kingdom**, three in **Slovakia**, two each in **Spain**, **France** (both overseas departments) and **Croatia**, one in **Slovenia**, as well as in the single region Member States of **Estonia**, **Latvia** and **Lithuania**.

Regional GDP per capita in the EU28 in 2011

* Capital region

1. GDP, and thus GDP per capita, provides a measure of the total economic activity in a region. It may be used to compare the degree of economic development of regions. GDP does not measure the income ultimately available to private households in a region. Details of the methodology used can be found in "Regional Accounts Methods: gross value added and gross fixed capital formation by activity", **Eurostat**, 1995, ISBN 92-827-0159-X.
2. The PPS (purchasing power standard) is an artificial currency that takes into account differences in national price levels. This unit allows meaningful volume comparisons of economic indicators over countries. Aggregates expressed in PPS are derived by dividing aggregates in current prices and national currency by the respective Purchasing Power Parity (PPP).
3. These data are based on the Nomenclature of Territorial Units for Statistics (NUTS) as modified in January 2011. NUTS 2010 provides a uniform, consistent breakdown of territorial units for the production of regional statistics for the EU. Level 2 of the nomenclature has 272 regions: Belgium (11), Bulgaria (6), the Czech Republic (8), Denmark (5), Germany (38), Ireland (2), Greece (13), Spain (19), France (26), Croatia (2), Italy (21), Hungary (7), the Netherlands (12), Austria (9), Poland (16), Portugal (7), Romania (8), Slovenia (2), Slovakia (4), Finland (5), Sweden (8) and the United Kingdom (37). Estonia, Cyprus, Latvia, Lithuania, Luxembourg and Malta are all considered as single regions at NUTS 2 level. For a list of the European statistical regions see: http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/introduction.

| <i>Extra-regio*</i> | <i>35 176</i> | | <i>32 892</i> | | |

* **Extra-regio:** The extra-regio territory is made up of parts of the economic territory of a country which cannot be assigned to a single region. It consists of the national air-space, territorial waters and the continental shelf lying in international waters over which the country enjoys exclusive rights, territorial exclaves, deposits of oil, natural gas etc. worked by resident units.

Until 2011, the gross value added (GVA) produced in the extra-regio was allocated pro-rata to the inhabited regions of the country concerned. The order of magnitude of the extra-regio GVA depends in particular on the resource endowment in terms of natural gas and oil. For EU Member States the share of extra-regio GVA varies typically from almost zero to about 2.5% of total GVA at national level. In 2011, Member States and the European Commission agreed to give countries the possibility to calculate regional GDP also for the extra-regio. The resulting GDP is available only in absolute values, because the extra-regio territory by definition does not have a resident population.

Member States are entitled, but not obliged to calculate GDP for the extra-regio. In the table extra-regio GDP appears only for those Member States which decided to make use of this possibility.
