

Climate Alliance

CLIMATE ALLIANCE

A European network of local authorities

- *Glocal Sustainable action*

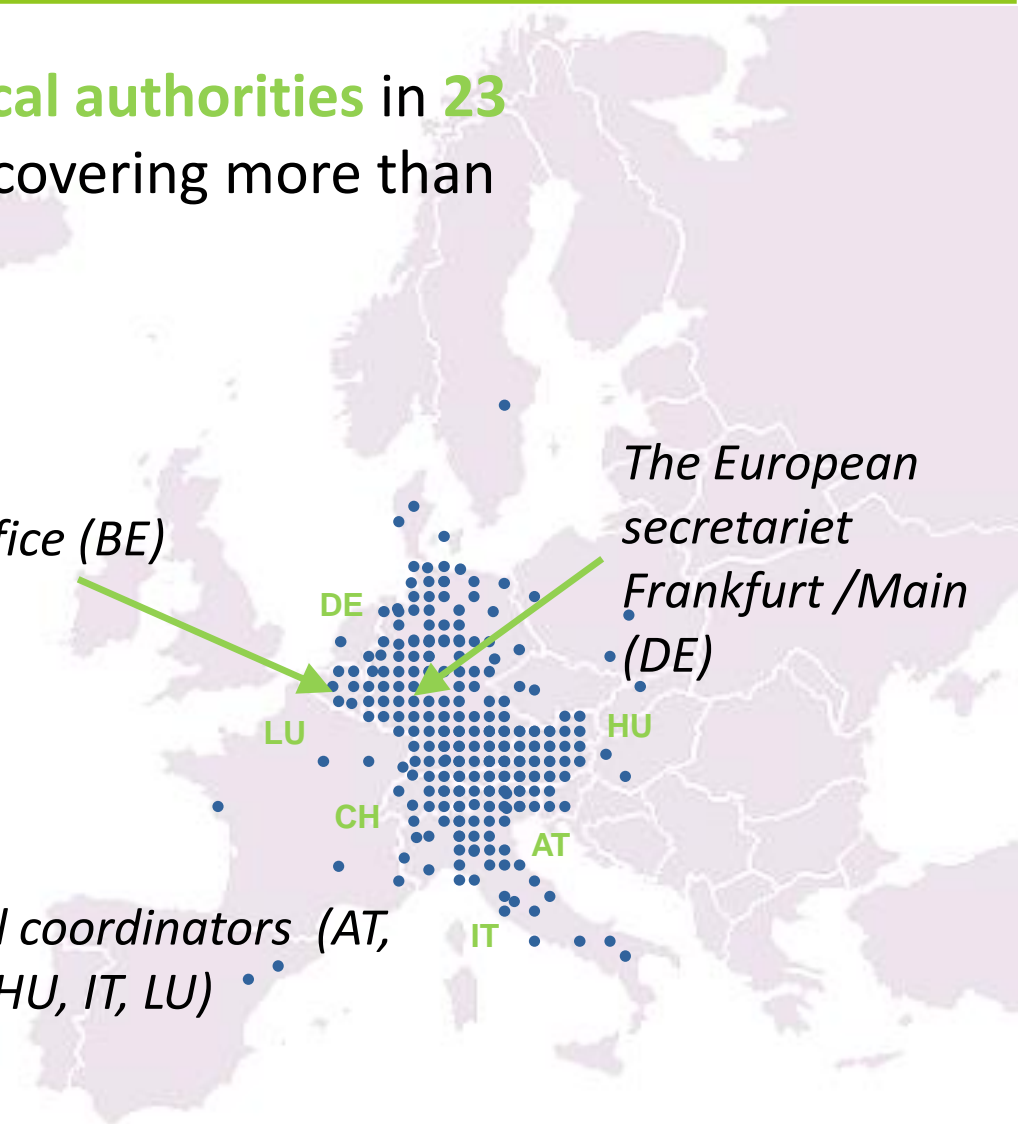

Climate Alliance is...

A network of **1700 local authorities** in **23 Countries** in Europe covering more than **87 millions** citizens!

Brussels office (BE)

*The European
secretariat
Frankfurt /Main
(DE)*

*National coordinators (AT,
CH, DE, HU, IT, LU)*

Climate Alliance is also...

A north/south
partnership between:

European Local
Authorities

The indigenous people
in the Amazon forest

to tackle climate change challenges
& protect tropical forests

By joining Climate Alliance, local authorities commit to:

- ✓ Reduce CO2 emissions by 10 % every five years
- ✓ Halve per capita emissions by 2030 at the latest (from the 1990 baseline)
- ✓ Cooperate with indigenous partners via various projects & initiatives in order to preserve the tropical rainforests

...A voluntary ambitious engagement...

... with quantified objectives

1990

2008

2030

Activities and missions

- 1/ Climate Alliance has developed a **comprehensive methodology** to support its members in implementing local climate plans. The methodology includes tools on how to set up a climate plan.
- 2/ Climate Alliance develops various **European projects** and runs its own **campaigns** on important fields of action – from adaptation to public procurement or sustainable mobility.
- 3/ Climate Alliance supports the **exchange of experiences** and promotion of the **achievements of its members**, for example through various best practice databases or the **Climate Star Award**.
- 4/ Climate Alliance represents the interests of committed local authorities at EU and international levels.

The roles of local governments:

- “Developers”: making the choices in urban planning and transportation crucial.
- “Consumers”: heating / lighting municipal buildings and equipment, managing public lighting and the fleet of municipal vehicles, etc.
- “Producer and distributors”: distributing energy and using local energy sources.
- “Innovators”: by example, seeking to better involve these actors scattered, giving the opportunity for citizens to participate.

→ **Decisions of local communities affect energy and climate!**

Examples of our tools

- The Climate Compass

→ A practical guide for a step-by-step methodology« to for local authorities to define the collective political goals followed by the development of an action plan

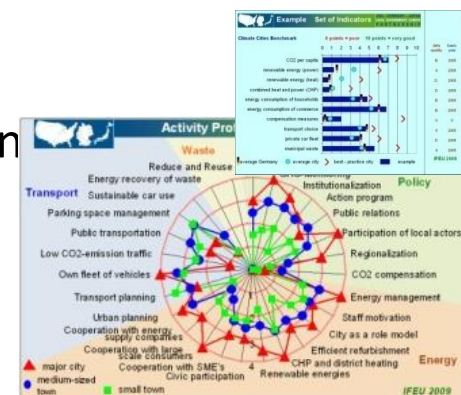

- ECORegion

→ An online tool for Climate Alliance members to calculate their CO2 emissions and energy balance in order to measure the progress of their CO2 emissions reductions

- Climate Alliance benchmarking tool

→ A tool for comparing achievements between similar cities (activity profiles & key indicators at a glance).

Examples of our European projects

- **SEAP Alps:** development of an integrated approach (mitigation and adaptation) to better prepare local authorities to climate change
- **100%-RES-Communities:** Development of a model action plan specifically for rural communities
- **Buy Smart +:** support for groups of local authorities to with joint public procurement
- **Action for MDGs:** integration of "Millennium Development Goals" in local climate and energy policy

Flagship project(s)

- Climate Alliance runs **the Covenant of Mayors Office** in partnership with four local government networks as well as its branch office (CoMO-EAST) for Neighbourhood countries, Southern Caucasus and Central Asia regions.

- **Mayors Adapt:** encourages policymakers to take long-term actions against the consequences of climate change for more resilient cities

The Covenant of Mayors towards 2030

- The new Covenant of Mayors on climate and Energy.
- Objective: support local authorities in taking coherent action on both **mitigation** and **adaptation** – promoting an integrated approach

Main focuses:

- Mitigation
- Adaptation
- Access

Recent announcements and recommendations

- Development of a portfolio "Competitive Europe - the vision of local authorities for the Energy and Climate Policy in 2030", with actions demonstrating a high potential in terms of **green local economy and job creation**
- Participation in Public Consultations launched by the European Commission:
 - Community Guidelines "State aid for environmental protection"
 - the "Framework 2030 climate and energy policy"
- **Various statements on:**
 - the urban dimension of European transport policy
 - the future of the programla dimension urbaine de la politique européenne des transports

See you at COP21 in Paris

- **OFFICIAL SIDE-EVENT - “Global Covenant of Mayors: Towards carbon neutral and inclusive cities”** 7 December | 15:00-16:30 | Le Bourget | Room 3
- **SIDE-EVENT AT EU PAVILION - “The Covenant of Mayors World Tour”** Date tbc
- **HANDOVER OF GREEN FOOTPRINTS TO UNFCCC EXECUTIVE SECRETARY** Date tdc
- **CLIMATE ALLIANCE EXHIBIT** 30 November-5 December | Le Bourget | Ground floor
