

GCCA Intra-ACP Programme

3RD REGIONAL TECHNICAL MEETING

25TH- 26TH APRIL 2016

PORT LOUIS, MAURITIUS

COMESA

**MCLAY KANYANGARARA
CLIMATE CHANGE ADVISOR**

An initiative of the ACP Group of States funded by the European Union

Cooperation in Coastal and Marine Resources Management

Issues

- Environmental
- Economic
- Social
- Political

Are well articulated by SIDS and other groupings

Cooperation in Coastal and Marine Resources Management

- Much has already been/is being done by many actors
- Many successes recorded
- Often, we learn more from unsuccessful attempts (failures)
- There are enough resources to make a start

Cooperation in Coastal and Marine Resources Management

Learning From Each Other

- Document, share, copy and improve on successes
- Learn what not to do/how not to do from unsuccessful attempts
- Exchanges at all levels
- Common positions, joint plans/actions

Cooperation in Coastal and Marine Resources Management

Examples

- Best practices sharing in advocacy, community engagement
- Complementarities between sustainable islands and cities
- CSA applied to coastal zones

Cooperation in Coastal and Marine Resources Management

Examples Cont'd

- Marine and inland blue economy
- Community resilience building
- Control of chemical and pesticides pollution of inland and marine waters
- Quantification of impacts of climate change on coastal areas

Cooperation in Coastal and Marine Resources Management

Best Practice Examples

- Caribbean: institutional development and capacity building
- Pacific: non-state actors and community engagement
- Africa: AGN, Presidential/Ministerial Conferences, CSA

Cooperation in Coastal and Marine Resources Management

Making it Happen

- GCCA is a good start
- Rotational RTMs already established
- Take this to the political/policy levels
- Promote people to people exchanges
- Mainstream into education

Thank You
