

March Global PFD 2017  
Inclusive multi-stakeholder partnerships  
Working groups: Methodology for facilitators and rapporteurs

Objective: Via concrete examples, understand the use and impact of multi-stakeholder partnerships in supporting the international development agenda.

Discussion groups will build on the morning panel session on multi-stakeholder partnerships, in which examples will be presented and debated.

Working groups divided up so that there is a mix of private sector, CSO, LA, governments, EU.  
NOTE: This will require prior division of the participant list and coding on name tags!

Methodology for PFD working groups:

All groups discuss and feedback on the same questions.

Each group chooses a facilitator and a rapporteur.

Avoid shopping list outputs; develop a concrete, value-added, coherent argument

1. Spend five to ten minutes reacting the panel session and whether or not the examples resonate with participants. Ask who is involved in multi-stakeholder partnerships (at any level)? (5-10 min)

2. What key factors determine the strength and success of multi-stakeholder partnerships (participants use post its to write down one factor per post it). These are compiled by facilitator into a master list on a flip chart. (10-15 min)

3. Discussion question:

*What do we need to do differently (policies; expectations; skills; etc) so that multi-stakeholder partnerships best support implementation of the 2030 Agenda?*

Be specific and cite examples in which PFD members are partners. (45 min)

The rapporteur takes back the answers and final outcome to the plenary (template to be provided)
