

Monitoring and Evaluation – Budget Support Ensuring Quality

Murray G Smith

This project is
funded by
the European Union

Why Focus on Budget Support

- Budget Support has become an important modality for development cooperation in the last decade.
- Different types of budget support:
 - Pooled funding for sector support involving donors, Multilateral Development Banks and the new vertical funds such as in the health sector;
 - General budget support with pooled funding;
 - Pooled funding for regional organisations Programme Based Approaches
- Budget Support has a different basis for accountability than project support.

Why do we monitor or evaluate?

Accountability
Results
Learning
Improved Quality

This project is
funded by
the European Union

Purposes of Monitoring/Joint Monitoring

- To provide information and input to Partner Governments and delegations on performance and progress.
- To provide information to EU HQ on performance and progress which can be shared with the Parliament, Member States and other donors.
- To support the PCM cycle; to enhance the quality of programming and to support the dissemination of lessons learned and sharing of experience.
- Differences between project approach and Budget Support

The Results Chain

Evaluation Criteria

Impact & Sustainability links: (depend on wide assumptions made and on outside conditions)

Effectiveness links: (depend on assumptions made and on outside conditions)

Efficiency links: from means through activities to results

Relevance to the identified problems or real needs to be addressed

LogFrame Levels

Overall Objectives
(overall lasting change, both at project / program level and beyond)

Purpose
(benefits actually received)

Results
(confirmed planned deliverables)

Activities
(process of converting inputs into results)

Means (inputs)
(Materiel, personnel, financial resources)

Design & Preparation

“Accountability and Measuring Results of Budget Support”

- (1) There are financial criteria for eligibility for Budget Support and there are various tools and approaches. There are the Public Expenditure Public Expenditure Financial Accountability Frameworks (PEFAS). As of April 2010 there were Public Financial Management (PFM) Performance Measurement Frameworks completed in 176 countries. Another tool is the Public Expenditure Tracking Surveys (PETS).
- (2) There is reporting on macroeconomic stability
- (3) Accountability is focused on achieving results and specifically outcomes

“How does it work in theory?”

- (1) PEFAs to determine eligibility
- (2) Macroeconomic Stability criteria and reporting
- (3) Focus on Results Frameworks (Matrices) or Performance Assessment Frameworks
- (4) National systems to be used for Monitoring and Evaluation

This project is
funded by
the European Union

SUPPORT TO QUALITY
MONITORING METHODOLOGIES

“How does it work in practice?”

- (1) Are PEFAs PFM PMFs supplemented by other tools such as PETS sufficient?
- (2) Experience with macroeconomic stability
- (3) Results Frameworks (Matrices) or Performance Assessment Frameworks (PAF): How is it working?
- (4) Are national systems used for monitoring and evaluation?

This project is
funded by
the European Union

Lessons

1. Strengthening of financial accountability and public expenditure management.
2. Be careful and realistic in setting targets for results.
3. There needs to be real partnership in setting results targets.

This project is
funded by
the European Union

Lessons

4. Technical assistance and capacity building on OVIs/ results frameworks/PAFs
5. Sharing of experience sharing and lessons learned.
6. Improved process for reviewing results indicators
