Development

Map: Distribution of threatened mammal species (IUCN/ASAP)

In all, some 5 000 species in the region are threatened

Threats:

- **Habitat loss**
- **Habitat degradation**
- **Over-exploitation and the illegal wildlife trade**

Drivers:

- Changing consumption patterns
- Weak governance
- Insecure rights

Strategic approaches:

- Protected areas
- Landscapes and seascapes
- Illegal wildlife trade

Protected areas:

- Resources
- Stakeholders
- Political support

Landscapes and seascapes:

- Planning tools
- Stakeholders
- Mainstreaming sustainability

Illegal wildlife trade:

- International links
- Multiple agencies and jurisdictions
- Weak regulations, low awareness
