

# Europass Digital Credentials

## Join the Early Adopter's Programme

### Step 1.

#### Choose an integration scenario

1

##### **Integrate the Europass Learning Model**

Your organisation will be able to encode your learners' activities, achievements, assessments, and entitlements.

2

##### **Issue Europass Digital Credentials**

Your organisation will be able to issue Europass Digital credentials by either the Europass Digital Credentials Issuer or by building your own issuer. You will need your own e-seal for this scenario.

3

##### **Export Europass Digital Credentials**

Your organisation will be able to export Europass Digital Credentials in other formats such as PDF. You will have to be nominated by a Member State and own an e-seal.

4

##### **Build your own wallet - compatible with Europass Digital Credentials**

Accept credentials from any issuer as well as transfers to and from other wallets. Users will be able to download their digital credentials.

5

##### **Build your own viewer - compatible with Europass Digital Credentials**

The viewer will display all information specified in the data model and must implement verification checks.

## Step 2. Register your interest

Register your interest at [edcsupport@ext-ec-europa.eu](mailto:edcsupport@ext-ec-europa.eu).

## Step 3. Scope of Work & Timeline

Agree on the scope and timeline for the integration with the Europass Digital Credentials Team.

## Step 4. Access to Data Model & Playground

Get access to data model, APIs, sources codes and developers' playground, and integrate with the Europass platform.

## Step 5. Feedback, comments and review

Give feedback, comments, and suggestions on Europass Digital Credentials and its future development.
