

EUROPEAN COMMISSION

The Economics of Climate Change Research

from different evidence lines from global to European analysis

Wednesday, 16 December 2009, 18:00 / 20:00, EU Pavilion

This event will discuss different new research results on the economics of climate change. The economic impacts of climate change, climate change mitigation and long-term targets, as well as costs in the LULUCF-sector will be revealed.

- 18:00/ Key note: Climate Change: The Challenge For Economics
18:25 **Michael Hanemann California Climate Change Center, UC Berkeley**
- 18:25/ New development of the PAGE model. New estimates of the social costs
18:45 of carbon, potential analysis of the economics of mitigation policy
Paul Watkiss, SEI Oxford. Chris Hope, University of Cambridge, UK
- 18:45/ 400ppmv by 2100: A combination of policies for carbon pricing and
19:00 regulation for energy and carbon efficiency. Results from the E3MG model
Terry Barker, Tyndall Centre for Climate Change Research, UK
- 19:00/ Comment on the developments of the PAGE and E3MG models
19:10 **Asbjørn Aaheim, Center for International Climate and Environmental
Research, (CICERO) Norway**
- 19:10/ Economic impacts of climate change in Europe: A sector approach to
19:25 agriculture, river basins, coastal areas, tourism and human health
Juan-Carlos Ciscar, Joint Research Centre, Spain
- 19:25/ Mitigation and Adaptation in the Global and European Land Use sector:
19:40 Reaping co-benefits and living with trade-offs
**Michael Obersteiner, International Institute for Applied Systems
Analysis (IIASA), Austria**
- 19:40/ Q & A. Discussion
20:00 **Moderator: Thomas Myhrvold-Hanssen (European Commission, DG RTD)**
