European Research Contributing to Global Knowledge on Climate Change: Working with Partners from Developing Countries

Monday, 14 December 2009, 15:30 / 17:30, EU Pavilion

This event will illustrate how European research is contributing to develop global knowledge on climate change in working closely with international partners from developing countries. Concrete examples of EU–Developing Countries research cooperation projects will be presented on the analysis of climate change impacts and adaptation or mitigation options.

- 15:30/ The European Research Programme (FP7) on climate change as key tool
15:40 for global cooperation in tackling climate challenges
J.M. Silva Rodriguez, Director General, EC-DG Research
- 15:50/ Preparing the 5th IPCC Assessment Report
16:00 **Prof. R.K. Pachauri, Director, TERI (IPCC Chairman)**
- 16:00/ Climate change impacts on glacier retreat in Northern India
16:10 **Prof. P. Kabat, Wageningen University and Research Centre**
- 16:10/ Understanding emerging, vector-borne diseases linked to climate change
16:20 in Africa
Dr. R. Lancelot, CIRAD, France
- 16:20/ Water and global change – Adapting to changing water resources
16:30 availability with focus on Africa partnership
Dr. R. Harding, Natural Environment Research Centre, UK
- 16:30/ Panel discussion and discussion with the audience
17:30 Moderation: **European Commission; DG Research**
