COEURE Executive Committee  
Meeting

**COEURE – CO**operation for **EU**ropean **R**esearch in **E**conomics – is a project intended to bring together the key stakeholders in the European economic research space – scientists from the different strands of economic research in Europe, economic policy makers, and funders of economic research - and which, by a process of stocktaking, consultation and stakeholder involvement, is aimed to formulate an Agenda for Research Funding for Economics in Europe.

It is framed within the European’s Commission Horizon 2020 initiative, the next European Framework Programme for Research and Innovation, Social Sciences and Humanities Area. Consequently, the main objectives of COEURE are to evaluate the strengths and weaknesses of the European research in economics and to map the frontiers of economic research, assessing the European contribution to these frontiers and evaluating its potential to contribute to the policy issues on the European 2020 Agenda.

Therefore, COEURE will be investigating how economic research addresses the following crucial policy issues on the European political agenda. In order to do so, it will produce a series of surveys on the different policy issues. Surveys will be focused around 12 main topics: **(these topics might be included in a link and not directly in the page, in order to make it shorter)**

1. Data and methods
2. Population, migration, aging and health
3. Inequality and Welfare
4. Human capital and education
5. Labor Markets
6. R&D, innovation and growth
7. Competition and Regulation in markets for goods and services
8. Financial markets
